LIST OF SNOWPLOWING CONTRACTORS

As a service to Kent residents, the City's Community Development Department has compiled a list of contractors and companies who have indicated an interest in providing snowplowing services to residents and businesses in the City of Kent. The name of the company, its contact information and the type of services provided are noted in the following list. There may be other contractors not on this list who are also providing these services.

Residents or businesses using this list are advised that the City of Kent has not negotiated any pricing with these contractors. In addition, the City does not warrant their work nor does it endorse any one of the contractors on this list. The cost of any services to be provided are to be established between the contractor and the customer and the customer is responsible for paying for the services.

We encourage residents and businesses using these services to secure services to clean both driveways and public sidewalks and to make sure that the contractor engaged cleans the snow in a manner that does not block sidewalks, the public street or into places where it constitutes a public nuisance. Property owners and contractors can be cited for violations as civil infractions and be fined for improper removal.

For more information about snow plowing efforts, please consult the Winter 2009 edition of the Tree City Bulletin, which is available online at www.kentohio.org.

C. PC10-002  JENNIFER THOMAS
            318 Cherry Street
            Conditional Zoning Certificate

The applicant is requesting a Conditional Zoning Certificate in order to operate a child care facility as a home occupation. The subject property is zoned R-3: High Density Residential.

1. Public Hearing
2. Planning Commission Discussion/Action

IX. OTHER BUSINESS

X. ADJOURNMENT
DATE: December 24, 2009

TO: Kent City Planning Commission

FROM: Jennifer Barone, PE Development Engineer

RE: Staff Report for the January 5, 2010 Planning Commission Meeting

The following item appear on the agenda for the January 5, 2010 Planning Commission meeting:

NEW BUSINESS:

CASE NO: PC10-001

APPLICANT: KENT COOPERATIVE ROOMING HOUSE

SITE LOCATION: 202 East College Avenue

STATUS OF APPLICANT: Kent Cooperative Housing is the owner of the property.

REQUESTED ACTION: Conditional Zoning Certificate and Site Plan Review & Approval

ZONING: C-D: Commercial-Downtown

TRAFFIC: The site is accessed from South Depeyster Street.

SURROUNDING LAND USES: Residential uses lie to the east and commercial uses lie to the north, south and west.

APPLICABLE CODE SECTIONS: Chapter 1113, 1119, 1146 and 1171 of the Kent Codified Ordinance
ANALYSIS:

Kent Cooperative Housing is requesting a Conditional Zoning Certificate and Site Plan Approval to raise the number of tenants from 3 to 4.

There has been some confusion about the allowed number of tenants permitted. Here is a brief history regarding this property.

On June 12, 1992 Planning Commission had approved a conditional zoning certificate for 4 unrelated people. However, the zoning permit was never obtained and the approval expired. That approval was contingent upon providing a fence or vegetative buffer and to install a fire escape to the third floor.

On June 18, 1992 the Board of Zoning Appeals granted two variances regarding parking. One allowed parking in the 20’ front yard setback off of Depeyster Street and the other permitted continued use of the 7’ driveway; whereas the code required a 20’ minimum driveway width.

On October 15, 1994 Planning Commission approved a Site Plan for construction of a hard surfaced parking lot containing four spaces for which a permit was obtained and the parking lot constructed.

On May 6, 2003 Planning Commission approved a Conditional Zoning Certificate and Site Plan to construct a new outdoor stairway and decking contingent upon the occupancy of the facility be retained at three unrelated persons until such time as the City approve an increase to four unrelated persons.

On September 9, 2009 the City issued a permit to allow the dining room to be converted into a bedroom. This work has now been completed.

With the completion of the conversion of the dining room into a bedroom, there are now four bedrooms in the house with appropriate exits to meet the building and fire codes. Hence, the applicant wished to increase the number of permitted unrelated person to four. With this increase, the applicant will also have to obtain licensure from the City of Kent Health Department and be subject to the associated inspection and licensure requirements.

Assuming the Planning Commission agrees, all of the special conditions from Section 1171.01 listed below appear to have been met except (17).

(11) Such uses shall be properly landscaped to be harmonious with surrounding residential uses.

(17) All permitted installations shall be maintained in a neat orderly condition so as to prevent injury to any single property, any individual, or to the community in general; a bond may be required to insure that this provision will be met.
(21) Lodging and boarding house uses shall be so designed, maintained and operated as to comply with inspection and rules of the City Board of Health and the regulations of all other applicable City codes, and to minimize possible disruptive effects on the character of adjacent and nearby properties.

(56) There shall be one parking space for every person that lives in said structure of building.

RECOMMENDATION:

Staff suggests tabling the project until such time as special condition (17) is met. Planning Commission may approve, approve with conditions or disapprove the application. Should Planning Commission wish to approve this project, the following language may be used:

I move that in Case PC10-001, the Planning Commission approve the Conditional Zoning Certificate and Site Plan submitted to allow up to four unrelated persons subject to the following conditions.

1. Obtain a license from the Health Department.
2. Limit of 4 people residing in the house.

List of Enclosures for This Project:

1. Applicant Cover Letter and plans dated December 2, 2009
2. Acknowledgement letter from Kent Cooperative Housing Inc date November 23, 2009
3. Legal Ad and Property Owner Notice
4. Aerial Topo and Zoning Map

CASE NO: PC10-003

APPLICANT: ESCOTT BUILDING ADDITION

SITE LOCATION: 628 South Water Street

STATUS OF APPLICANT: The applicant, Richard Tinker, is the owner of the property.

REQUESTED ACTION: Conditional Zoning Certificate and Site Plan Review & Approval

ZONING: R-C: High Density Multifamily - Commercial Urban Residential District

TRAFFIC: The property is accessible from Alley #12 off of South Water Street.
SURROUNDING LAND USES: The property is surrounded by residential uses to the south and east and by commercial (church) to the north and west.

APPLICABLE CODE SECTIONS: Chapter 1113, 1119, 1137 and 1171 of the Kent Codified Ordinance

ANALYSIS:

The applicant has outgrown the existing facility and is requesting a Conditional Zoning Certificate and Site Plan Approval to construct a 2267 SF building addition. Since the addition is greater then a 50% increase to the existing building size, Planning Commission approval must be obtained.

The applicant had purchased the adjacent lot to the north in order to facilitate this addition. No additional parking is proposed since the existing 37 parking spaces exceed the 20 spaces required for the existing and new building addition in total. The existing sign is adequate so no additional signage is requested.

An underground detention facility is proposed to handle the storm water runoff. This will discharge into an existing storm pipe near Alley # 12. The pipe crosses Trinity Lutheran Church property. The applicant has been advised to seek an easement from the church.

The exterior lighting plan for the new addition had not been finalized but will most likely be "can" lights at the canopy entrance and a wall pack on the parking lot side. Some landscaping is proposed on the north side which may or may not include lighting.

Assuming the Planning Commission agrees, the proposed use appears to meet the specific conditions listed below as set forth in Section 1171 of the Zoning Code.

(4) There shall be no more than one advertisement oriented to each abutting road identifying the activity.

(5) No lighting shall constitute a nuisance or in any way impair safe movement of traffic on any street or highway; no lighting shall shine directly on adjacent properties.

(8) Such developments shall be located adjacent to nonresidential uses such as churches, parks, industrial or commercial districts.

(10) Site locations shall be preferred that offer natural or man-made barriers that would lessen the effect of intrusion into a residential area.

(11) Such uses shall be properly landscaped to be harmonious with surrounding residential uses.

(46) The architectural design should be developed with consideration given to the purposes of this district and commercial uses shall be so designed as to minimize possible disruptive effects on the character of properties in adjacent residential zones. Parking shall be provided for each commercial use according to the provisions of Chapter 1167. Parking for commercial uses shall be in addition to that required for the multifamily dwellings.
The Architectural Advisory Board reviewed this project and had no recommendation since the materials being used will match the existing structure.

RECOMMENDATION:

Staff recommends the condition of technical plan review be added. Planning Commission may approve, approve with conditions or disapprove the application. Should Planning Commission wish to approve this project, the following language may be used:

I move that in Case PC10-002, the Planning Commission approve the Conditional Zoning Certificate and Site Plan submitted for an additional to the Escott Company building subject to Technical Plan Review.

List of Enclosures for This Project:

1. Applicant Cover Letter and plans dated December 4, 2009 (received December 7, 2009)
2. Legal Ad and Property Owner Notice
3. Aerial Topo and Zoning Map

CASE NO: PC10-002

APPLICANT: Jennifer Thomas – Day Care

SITE LOCATION: 318 Cherry Street

STATUS OF APPLICANT: The applicant resides on the property.

REQUESTED ACTION: Conditional Zoning Certificate to operate a child care facility as a home occupation in her house.

ZONING: R-3: High Density Residential

TRAFFIC: The property is accessible from Cherry Street.

SURROUNDING LAND USES: The property is surrounded by residential uses.

APPLICABLE CODE SECTIONS: Chapter 1113, 1119, 1133 and 1171 of the Kent Codified Ordinance
ANALYSIS:

The applicant, Jennifer Thomas, is seeking approval of a home occupation to operate a child care business from her home. However, the application is not complete at this time and staff requests the project be tabled.

Subject: Traffic Engineering & Safety Meeting of December 10, 2009  
TE&S 2009-09  

Report Date: December 22, 2009  

1. The meeting began with a discussion of traffic and safety concerns in the area of Davey Elementary School. Mr. Soyars, the Kent Schools Business Manager joined the committee for this discussion.  

   There have been recent concerns expressed to the Kent Schools regarding parking enforcement actions during the period at the close of school daily. Most violations have occurred in circumstances where cross walks have been blocked by drivers waiting to pick up students. It has also been reported that vehicles park or stop in locations that block traffic which also results in children darting between cars to get to the pick-up vehicle. The concern has been raised to the point where the school system has inquired about surveying the neighborhood about making Whittier Dr a one way street, although this is currently being held in abeyance while other options are being reviewed.  

   During the discussion, the committee considered the number of students that are typically bussed, that walk and that are picked up by personal vehicle. Further discussion considered parking on surrounding streets, which parents have been encouraged to use as a form of traffic calming in the area. Additional considerations include additional on-site remedies of driveways that enable parking/standing off the street in areas that will not be in the primary egress areas of the children. Other ideas included staggered release times, and quantification of vehicle count data during the school day. Mr. Soyars will review the issues and return to a later meeting of the committee.  

2. Another issue related to the area of Park & Prospect was discussed. There was a citizen call about the parking in the area, and the potential disruption that it creates. At issue are the number of vehicles parking on the streets, and the staggered parking utilizing each side of the some of the streets from block to block. After review, it was agreed that this configuration was implemented as an attempt at traffic calming. It appears to be having some positive effect, which is especially good currently while some drivers may use this area as a route to avoid the Mantua St. construction area.  

3. In this item, the committee discussed the parking use of the W. Main St. bridge. It was decided that two different considerations are commonly considered by the public in this regard; traffic flow, and visual improvement. Some review of crash reports over the last four years indicated that there were no median-related crashes in the parking area. In 2008 there were two crashes that could be considered congestion related during the Crain Ave bridge closing for the railroad derailment. It was felt that the rate
of crashes may need to be considered, but an effective analysis will require accessing data from 2002 to 2005.

An attempt will also be made to develop a time study of various comparative routes through the city in an effort to consider alternatives before and during the signalization planning. Ultimately, any changes in the area will also have to be delayed until bridge maintenance work by the County Engineer is completed.

4. Overnight street parking in the downtown was discussed with concerns raised regarding maintenance, plowing and the most frequent concern being trash and litter clean-up, including regular dumping of the downtown trash bins. The general concern from the service department continues to be maintaining the streets properly. There is currently no recommended alternative.

5. The committee considered a suggestion of prohibiting left turns from southbound Mantua St to Crain Ave during the construction and single lane traffic flow. The Engineer pointed out that this phase of work had been completed by Dominion East Ohio, and is not likely to occur with any significant frequency in the near future.

   In March of 2010, northbound on Gougler will be reduced to one lane. Two lanes will be retained for the southbound traffic. Frequent radio broadcasts will be utilized to inform the public of current traffic patterns.

6. A discussion took place regarding the increase of large trucks servicing businesses along state routes (primarily E. Main) by blocking the route or the adjacent side streets. This is occurring by trucks as delivery vehicles, as well as trucks stopping to make purchases. Both actions seem to be increasing, and are more impacting due to the apparent increase in traffic in general.

   After general discussion, it was decided to notify business owners, requesting that they discourage vendor and customer use of these streets in this fashion during peak traffic periods, and to avoid stopping where it conflicts with other users of the road. Letters will be sent to the businesses that are most effected.

7. The proposed flag display policy was reviewed, with a general consensus to present it to the City Council in a future meeting.

8. The proposed plan to convert the city's radios to meet the new federal standards for narrow banding was reviewed and discussed. Although the new standards are a couple of years away, the upgrade is being proposed to coincide with system upgrades budgeted in 2009 in the service and fire departments.
